

BI360, The Self-Service Business Intelligence Suite

BI360 provides a complete Excel and web-based suite, comprised of Reporting and Budgeting, Dashboards and a pre-configured Data Warehouse.

Solver's BI360 Suite is the most complete Business Intelligence (BI) solution of its kind, and it is available for both on-premise and cloud-based deployment.

BI360 comes with out-of-the-box live integrations to many ERP products including Microsoft Dynamics (all), SAP B1, Sage, and others. It also has a pre-built reporting engine so it doesn't matter what system your running.

BI360 was built for quick, low risk implementations; in fact, it takes only a fraction of the time to implement compared to typical BI suites. It uses Microsoft Excel as a front-end rather than forcing users to learn a proprietary interface.

BI360 has much of the same functionality as much larger and more complex tools but has been developed to cater to the many medium-sized businesses where the platform needs to be managed by business users rather than a dedicated IT team.

BI360 delivers value not just in terms of functionality, ease of use and rapid implementation but also in terms of significantly reduced costs and low long-term total cost of ownership.

Olympic Software is proud to partner with Solver and have won the Partner of the Year Award in 2013, 2014 and 2015.

"BI360 has helped us improve both our reporting and budgeting processes. It is time saving and enables us to generate faster, accurate and complex reports with a simple click. It is easy to use for designing reports and helps maintain a consistent report format throughout the organisation. "
Joy Anore, EMA

"BI360 helps us to speed up month end reporting. Surprised how easy it was to deploy, collate and consolidate annual budgets."
Eric Chang, VINZ

Delivering
complete insight

Introducing

BI360 consists of four modules:

Reporting:

- Reporting your way - Excel, Web, Mobile
- Enterprise wide reporting - live off the ERP or BI360 Data Warehouse
- Advanced consolidation capabilities
- Ad-hoc reporting and analysis
- Drill to transaction detail
- Drag and Drop report design

Dashboards:

- Enterprise wide analytics - live off the ERP or BI360 Data Warehouse
- Web-based for anywhere, anytime access
- Fully customisable dashboard layouts
- Interactive charts, reports and more
- Drag & Drop dashboard design

Budgeting:

- Budgeting your way - Excel, Web, Mobile
- Streamlined data entry
- Budget data immediately available for reporting
- Approval workflow for management
- Pre-built as well as user defined input templates
- Copy history and make changes in a single click

Data Warehouse:

- Preconfigured Data Warehouse that can be set up in days, not months
- Integrate to virtually any data source including cloud
- User friendly 'Office-like' interface built for business users
- Advanced business rules such as Currency, Elimination, Allocations, KPIs, etc.

Top 10 reasons to choose BI360

1. Complete BI – reporting, budgeting, dashboards, data warehouse
2. One tool, any data, across your enterprise
3. Drag & Drop design, easy to adopt
4. Full ERP reporting from GL through all sub-ledgers
5. Move from many Excel files to single templates shared by all.
6. Designed to be a self-help solution.
7. Low total cost of ownership
8. Next generation data warehouse, a central repository for multiple data sources
9. Easy to use tool – Excel, Web, Mobile
10. Proven solution – Gartner Group Magic Quadrant 2014 and 2015.
